

Milestone 1: SDTM Domain Inventory

Sanofi EFC10261 SDTM Submission

Objective

Understand the structure of the Sanofi EFC10261 SDTM submission package by reviewing the available SDTM domains, classifying them according to CDISC observation classes, and identifying the datasets that support downstream clinical review and analysis.

Summary of Work

- Reviewed all SDTM domains included in the submission package.
- Classified domains by CDISC observation class (Interventions, Events, Findings, and Special Purpose).
- Distinguished subject-level domains from repeated-record domains.
- Explored domain structure, record counts, and subject coverage.
- Identified the primary datasets used for subject-level clinical review.
- Developed a reproducible SDTM domain inventory workflow in R.

Key Result

SDTM Domain Inventory					
Sanofi EFC10261					
domain	description	class	n_records	n_variables	observational_unit
AE	Adverse Events	Events	9235	42	One record per adverse event
CD	Cancer Diagnosis	Findings	3183	13	One record per cancer assessment for a subject
CE	Clinical Event	Events	27589	26	One record per clinical event experienced by a subject
CM	Concurrent Medication	Interventions	12119	27	One record per concomitant medication used by a subject
DM	Demographics	Special Purpose	455	18	One record per subject
DS	Disposition	Events	3104	19	One record per disposition experienced by a subject
EG	Electrocardiogram Test	Findings	535	14	One record per ECG assessment (test) performed on a subject
EX	Exposure	Interventions	5639	24	One record per treatment exposure for a subject
IE	Inclusion/Exclusion Criterion	Special Purpose	61	14	One record per inclusion/exclusion criterion assessment for a subject
LB	Laboratory Test	Findings	90466	32	One record per laboratory assessment performed on a subject
LS	Lesion	Findings	12526	23	One record per lesion assessment for a subject
MH	Medical History	Events	8353	25	One record per medical history event or condition for a subject
PC	Pharmacokinetic Test	Findings	9754	25	One record per pharmacokinetic test performed on a subject
PE	Physical Examination	Findings	2001	15	One record per physical examination assessment performed on a subject
QS	Questionnaire	Findings	14017	21	One record per questionnaire result for a subject
RA	Radiotherapy	Interventions	300	15	One record per radiotherapy treatment administered to a subject
SG	Surgery	Interventions	2310	22	One record per surgery procedure for a subject
SU	Substance Use	Findings	478	19	One record per reported substance use record for a subject
SV	Subject Visits	Special Purpose	6006	11	One record per subject visit
TA	Trial Arms	Special Purpose	90	10	One record per planned study element within a treatment arm
TE	Trial Elements	Special Purpose	4	7	One record per planned study element
TI	Trial Inclusion/Exclusion Criteria	Special Purpose	32	5	One record per inclusion or exclusion criterion defined in the study protocol
TS	Trial Summary	Special Purpose	22	6	One record per trial summary parameter
TV	Trial Visits	Special Purpose	62	6	One record per planned study visit
VS	Vital Signs	Findings	21359	20	One record per vital sign assessment for a subject

Figure 1. Overview of the SDTM domains included in the Sanofi EFC10261 submission package, organized by CDISC observation class.

Skills Demonstrated

- CDISC SDTM familiarity
- Clinical trial data exploration
- R programming
- Clinical data organization
- Reproducible programming workflows
- Git and GitHub version control
